Please send me the following items for which I have enclosed payment:

ITEM	DESCRIPTION	UNIT PRICE	QTY	TOTAL
1	JWM-1 Keyboard System	$69.95 US*		
~~2~~	~~JWM-7 Keyboard System~~	~~$99.95 US*~~		
3	JWM-3 Cartridge Adaptor	$24.95 US		
~~4~~	~~JWM-5 Speech Synthesizer~~	~~$39.95 US~~		
5	JWM-6 Joystick Interface	$19.95 US		
6	JWM-7 Spectrum Interface	$39.95 US		
7	JWM-2 Sound Booster	$41.50 US		
~~8~~	~~JWM-4 RGB Interface Unit~~	~~$34.95 US~~		
			Total Amount Enclosed	

* If you are ordering the keyboard, please include $5.00 US to cover postage and handling. Postage and handling is included in the price for all other units.

Includes single key entry for EDIT, DELETE, CAPS & CURSOR keys

TS2048/TS1000/ZX81 KEYBOARD SYSTEM

Are you tired of that inferior keyboard on you TIMEX computer? I have a large supply of the JWM-1 Keyboard system for these computers. The system consists of a 47 key keyboard complete with interconnecting cable, interface card, wooden cabinet and TIMEX keycap legends. The interface unit plugs into ~~either~~ the cartridge port on the TS2068.~~or the expansion bus on the other computers. An interface unit is also available to plug into the expansion bus of the TS2068 if desired.~~ No soldering or wiring is required nor is it necessary to open your computer. Simply plug in the interface card then plug the keyboard interconnecting cable into the interface card then turn on your computer and your in business.

~~I also have available a JWM-7 65 Key Keyboard System with the same features as above but includes single key entries for all the punctuation marks and simple arithmetic functions as well as DELETE, EDIT and all the Cursor keys. Entry into EXTENDED MODE is also a single key press.~~

The price for the JWM-1 Keyboard System is $69.95 US/$92.25 CAN

~~The price for the JWM-7 Keyboard System is $99.95 US/$132.00 CAN~~

JWM-3 CARTRIDGE ADAPTOR UNIT

The Cartridge Adaptor Unit allows you to plug cartridge peripherals into the rear expansion bus of the TS2068 Computer. The unit includes a through connector to allow connection of other peripherals.

The price for the JWM-3 Cartridge Adaptor Unit is $24.95 US/$32.95 CAN

JWM-2 SOUND BOOSTER

Are you into music or would you like to add more realism to your games then add a JWM-2 Sound Booster amplifier to your TS2068 computer. The Sound Booster amplifies both BEEP and SOUND command generated audio to a level sufficient to drive an 8 inch speaker. A low level output is also provided in the event you wish to use a separate power amplifier such as your stereo. Sound Booster uses its own internal 9 volt battery for power and includes a power on-off switch as well as a volume control. A through-bus connector is included for connecting other peripherals.

The price for the JWM-2 Sound Booster is $41.50 US/$54.75 CAN. This price does not include the 9 volt battery or speaker as these are readily available from retail electronic stores such as Radio Shack. Radio Shack speakers 40-1272 or 40-1271 speakers work well with Sound Booster.

JWM-4 RGB INTERFACE UNIT

Show the true capability of your TS2029 computer by connecting it to an RGB monitor using the JWM-4 RGB Interface Unit. No more wishy washy colours that creep amongst the noise but crystal clear brilliant colours that remain rock steady and true. The RGB Interface unit plugs into the rear expansion connector of your computer and includes a through-bus connector to accomodate other peripherals.

The price of the JWM-4 RGB Interface Unit is $34.95 US/$45.95 CAN. This price includes the cable to connect the interface unit to the RGB monitor but does not include the monitor connector as it is impractical to stock connectors for the variety of monitors on the market.

JWM-5 TS2068 SPEECH SYNTHESIZER

This is a fully-decoded speech synthesizer that can be used to add speech to your existing programs or to include speech in your new programs. The unit uses the General Instrument SPO256A speech synthesizer chip that allows you to program your computer to say virtually anything in English. The unit includes its own audio amplifier, filter and volume control. An external 9 volt battery provides power so as to minimize the drain on your computers power supply. Audio output drives an 8 ohm speaker. Neither the speaker or the 9 volt battery are provided as these are readily available at retail electronic suppliers such as Radio Shack.

The price for the JWM-5 SPEECH SYNTHESIZER is $39.95 US/$52.50 CAN.

JWM-6 TS2-68/SPECTRUM JOYSTICK INTERFACE

This is a fully decoded interface for use with Spectrum programs requiring a Kempston joystick interface. The unit was designed to work with a 9 pin Atari type joystick. It is intended for use with the TS2068 operating in the Spectrum mode using either a ROM switch or emulator.

The price for the JWM-6 Joystick Interface is $19.95 US/$26.50 CAN

JWM-7 SPECTRUM INTERFACE FOR THE TS2068

This hardware was designed specifically for connecting the DISCIPLE disk system to the TS2068 but should accomodate most SPECTRUM peripherals. The unit is essentially a "twister" board that matches the appropriate traces on the edge connectors of the TS2068 and the SPECTRUM computers. The board includes 9 and 12 volt power supplies.

The price for the JWM-7 Specrtum Interface is $39.95 US/$47.50 CAN
